PROFESSIONAL SUMMARY

Motivated MCA student specializing in AI & Machine Learning with strong interest in Data Science, Cloud Computing, and Web Development. Skilled in Python, Java, Flask, and Machine Learning concepts with hands-on experience in academic and personal projects. Passionate about building real-world applications and learning modern technologies like AWS and AI frameworks.

EDUCATION

Master of Computer Application (AI DS)

Aug 2025 - March 2027

Parul University, Vadodara | GPA: 8.5/10

Bachelor of Computer Application

Aug 2021 - Sept 2024

Veer Kunwar Singh University, Ara Bihar | Percentage: 71.33

TECHNICAL SKILLS

Programming Languages:	Python, Java, SQL, C
Web Technologies:	HTML, CSS, Flask, Django
Machine Learning:	Scikit-learn, Pandas, NumPy
Cloud & Tools:	AWS, GitHub, VS Code, Jupyter
Database:	MySQL
Core Subjects:	DBMS, OOPs, Data Structures

PROJECTS

Campus Market | JavaScript

- Built a Campus Market platform for students to buy and sell products within the college campus.
- Implemented product listing, search functionality, and user authentication features.
- Designed responsive user interface for smooth browsing experience across devices.
- Created backend database system to manage users, products, and transactions efficiently.

Attendance Management System | Python, Flask, MySQL

- Developed a web-based attendance system for students and teachers
- Implemented login authentication and attendance tracking features
- Designed MySQL database for storing attendance records
- Improved attendance management efficiency through automated reporting

Folder Sync | HTML

- FolderSync is a simple, private way to sync files and folders between your laptop and phone over local Wi-Fi. Just run it on your laptop, scan the QR code with your phone, and start sharing. Dropped files sync instantly in both directions. No cloud, no account logins, and no data leaves your home network
